

PAIN AND MOBILITY

Boehringer Ingelheim welcomes collaborations with partners in **pain and mobility**, who share our passion for improving the health and wellbeing of animals, to help us find solutions to some of the biggest challenges in animal health today.

Pursuing Innovation

- Leveraging our track record of expertise
- Target, Repair, Prevent strategy investigates pathways and mechanisms associated with chronic inflammatory diseases
- Research focus aims to meet unmet needs in acute and chronic pain with easy-to-administer formats.

Actively pursuing new partnerships in our areas of interest and open to a variety of partnership models to explore:

- Novel, non-opiate treatments for post-surgical pain
- Regenerative, disease-modifying approaches for OA, able to be administered infrequently or by non-intra-articular routes
- Analgesics with novel mechanisms of action
- Oral, non-NSAID chronic pain treatments with excellent safety profile.
